

Tampa Ship Repair Movement Planning Form

For **every** movement in or out of TSR this form should be submitted to TBPA Dispatch at least 24 hours before the planned movement. If the movement is internal to TSR a second page should be used for “before and after” details. Please illustrate the vessel’s starting/ending position, **AND** the position of all adjacent vessels, camels, etc. Include the dimensions of each, and relevant distances to other vessels, sill walls, etc.

Please describe in detail the specifics of this movement plan as well as any additional movements that will be coordinated with this one (other vessels, sill walls, etc.)
